ComResource has migrated tens of thousands of files using the IBM SFG MFT solution. Capitalizing on this experience, we created the OPTx to expedite the IBM SFG implementation and extend its capabilities for maximum functionality.

WHAT OPTx DOES FOR YOU

- Specially built to expedite the implementation of the IBM SFG MFT solution
- Simplifies data migrations
- Extends the capabilities of the IBM SFG MFT solution
- Optimizes visibility and efficiency during all phases of the migration process

Data Import → Data Massage → Go Live

Track & Report

HOW OPTx WORKS

Implementation Jumpstart

Pre-built extensible protocols / routing channels

Reusable flow patterns

Sub-folder mailboxes and listening producer controls

Easy configuration interface

Core product import service publishes to SFG

Test-to-production promotion

Not dependent on SFG Version (v2.2.4+)

Migration Management

Divisional access support

Tailored import from Connect:Enterprise

Dynamic reporting extension

Customizable dashboard views

Automated notifications and audit trail

User notes by partner and to-do list
