

Project Delivery Excelerator (ProDEx) is a cloud-based, project management and execution tracking and reporting tool designed by ComResource to simplify data migration projects.

WHAT ProDEx DOES FOR YOU

- Documents, schedules and reports on IT services
- Demonstrates competitive differentiation based on methodology and history
- Leverages real-time process and operational insight
- Executes Services Delivery more consistently
- Increases Services Delivery efficiency
- Continuously improves the quality of Services Delivery
- Increases accountability of the delivery team and customer
- Provides additional value-added features to an existing service
- Enhances reporting and communication with trading partners

HOW ProDEx WORKS

OPTx

Central repository to manage and track migration elements

Single-instance database allowing multi-user access

Reports generated automatically and emailed directly to recipients

Customer or management logs to check event status

Documented workflow and status reporting

ProDEx as a Software-as-a-Service (SaaS)

Your own private virtual instance of ProDEx as a service for you and your customers

Your own custom project types, elements, and services workflows

Personalized: Include your own logo

Hosted, managed and supported by ComResource

Managed Service options available
