Control How Your Money is Spent

Our team will work closely with you to determine the scope of services needed and the required hours for successful delivery. By using our ticketing system or our support line, a qualified resource will be assigned to perform the service(s) and cover any additional system tuning. You will have visibility throughout the process to see where your money has been spent, and if you go under or over the monthly hours, we can either bank or loan those hours*.

Our Process

| Determine Services Hours | Request & Perform Services | Report & Approve Services | Balance Monthly Hours |

*There is a maximum of three month's worth of time that can be accumulated as banked or loaned.

Choose What's Best For You
