

SECURE & FULL-SERVICE ENVIRONMENT FOR TESTING CLIENT SYSTEMS

The ComResource B2B Test Center

Do you have a critical need to simulate system connections for your clients while ensuring no impact to their business operations?

Would you benefit from a solution that supports all protocols/ transports, assistance with environment setup, scenario testing, and application support?

Test Center Capabilities At-A-Glance

The ComResource facility grants you full control to an environment featuring state-of-the-art security, hardware, and full-fire suppression systems which allows you to safely test key system changes to:

-  **Firewalls**
-  **Middleware**
-  **Communications**
-  **Networks**
-  **Applications**

Space is available for short- and long-term rental.

24/7 Environment Access

Use our Test Center to simulate:

- Various protocols and transports
- Different push/pull scenarios
- Updates to certifications, keys, passwords - authentication
- Using encryption (i.e. PGP, GPG)

Added Value With Your Own Private Cloud

Our Test Center allows you to host your own environment that supports:

- HTTP Client/Server
- FTP Client/Server
- SFTP Client Server
- EDIINT (AS1/AS2/AS3/AS4/AS5)
- Connect Direct (IBM P2P)
- And more...

Schedule a Tour!

We're excited to walk you through our space and learn more about your needs.
